

The image shows a Windows terminal window with a dark background. The title bar at the top indicates the window is titled "D:\Exp 27 (simulate unix is co" and has standard minimize, maximize, and close buttons. The terminal content shows a sequence of commands and their outputs:

```
Enter file name: one page report
Enter the pattern to search: Error opening file: No such file or directory
-----
Process exited after 10.38 seconds with return value 1
Press any key to continue . . .
```
